

Serious Car Accident Causes Injuries

Swerving to the side to avoid a car turning into Weavers Filling Station, one mile north of Red Deer, caused a serious accident last week when a roadster driven by Miss Helen King of Lacombe, turned over.

Mrs. M. VanWassenhove, who was a passenger in the car with Miss King, was most seriously hurt, suffering a dislocated shoulder and being cut over the right eye, necessitating five stitches in her face, as well as receiving many painful body bruises.

The driver of the car causing the collision was an Edmonton man, and was held by the police after the accident but was released later.

The two ladies were travelling to Red Deer when the accident occurred and claim they were forced into the guard rail of the filling station, demolishing the fence and tipping over. Both passengers were pinned under the car, but Miss King escaped with minor injuries. The other car was forced to the ditch and the right rear wheel broken off, but the driver sustained no injuries.

The injured were taken to the Red Deer hospital and were attended by Dr. Nix and Dr. Hume of Red Deer. Mrs. VanWassenhove is making good progress towards recovery, and is expected to be home in Lacombe on Sunday last.

The Churches

THE CHURCH OF ENGLAND IN CANADA

St. Cyprian's Church, Lacombe
Diocese of Calgary
Incumbent: The Rev. T. H. Chapman.
Licensed Lay Readers: Messrs. E. H. Jones, K.C., and A. T. Inskip, Esq.
Organist: Mrs. L. D. Wright.
Friday, 7:30 p.m., choir practice.
Nov. 3rd, 8th, Sunday after Trinity, 10:00 a.m., Sunday School.
11:00 a.m., Morning Prayer.
7:30 p.m., Evening Prayer.
All services in the United Church Hall.

1. The contractors have just now informed us that we shall not be able to use our church before Nov. 10.

2. We hope to have a Congregational Supper on the evening of November 9. Further particulars by letter in the near future.

3. On Nov. 10 the bishop will be here to dedicate the improvements on the church. We expect to hold our annual harvest thanksgiving service on that date.

ST. ANDREW'S UNITED CHURCH

Rev. R. B. Layton, B.A., B.D., Minister.
Services at 11 a.m. and 7:30 p.m. Sunday School at 11 a.m.
Rev. D. Whyte Smith of Red Deer will preach in the morning, and Rev. H. E. Parker, B.D., of Millet in the evening. This is in accord with a general exchange arranged by Lacombe Presbytery.

At the request of the Lest-We-Forget Club an Armistice Day Service will be held in the United Church on Sunday evening, Nov. 10. Further announcement will be made later.

The Young Ladies' Auxiliary plan to hold their Annual Bazaar on Dec. 4th.

Police Chief Issues Warning Against Halloween Pranks

Youngsters and youths who decide to go too far to celebrate Halloween had better keep within reasonable limits, as Police Chief A. MacDonald has issued a warning that wilful damage will not be tolerated Thursday night.

Keep away from the signs is the request of the Police Chief. Extra police will be on duty and culprits will be severely dealt with, if damage has been done.

Spruceville

There will be a dance in the hall on Friday evening, Nov. 8, sponsored by the Hall Board. Music by DeLong's orchestra.

The Busy Bees will hold their regular meeting on Saturday evening, Nov. 9, at the home of Mr. W. Barnes. The roll call to be answered by an Alberta Natural Resources and its use. An interesting program will be given.

Spruceville reorganized their Sunday School last week. The following officers were elected: Supt., Cliff Burton; sec.-treas., Donald Proudfoot; bible class teacher, Gordon Black; inter-med., Mrs. B. Crocker; Juniors: Mrs. O. Young; primary: Jean Southward; organist, Eunice Stout and Laurence Proudfoot. A vote of appreciation was given to Mrs. Barker, Sr. (retiring supt.) for her faithfulness and devotion in carrying on the S. S. in the past six years.

Mr. Roy Whitelinton received word his brother at Vernon, B.C. was accidentally killed. He and another brother left Monday morning to attend the funeral. Much sympathy is extended to his wife and family.

A few of the younger married couples around here attended an anniversary dinner at the home of Mr. and Mrs. Clarence Kasha on Tuesday evening.

Mrs. W. W. Burton spent a few days last week with her daughter Mrs. Harry Muncie.

BOARD OF TRADE HEARS WOLLEN MILL PROPOSAL

President Henry Trame conducts Well Attended Meeting to Hear Particulars

At a well attended meeting of the Board of Trade held in the Town Hall on Tuesday evening the members heard W. J. Williams, president of the Alberta Woollen Mills Ltd. outline his proposal to establish a woollen mill in Lacombe. At the opening Henry Trame, president of the board, gave the purpose for which the meeting was called, and then called on Mr. Williams. While Mr. Williams stated he had no proposition to make, he wished to acquaint the members with the possibilities of establishing a woollen mill in the town. From information given at the meeting the atmospheric and climatic conditions such as existed in this district were ideal for the proposed mill, whereas a number of large woollen mills of which he had had to use humidifiers. In his investigations he found \$15,000,000 was spent each year in Alberta for goods of woollen manufacture, wool and one half million pounds of raw wool was shipped out of Alberta yearly, comprising the total clip, a large proportion of the wool coming from the provinces in finished products, and the big saving to the farmer in freight would run into thousands of dollars.

If a mill were established in the town it would benefit greatly from the purchasing power of about 100 employees who would be on the payroll, aiding also the unemployment situation, and relieving the government of paying relief to that number. In addition the milling industry would benefit as it would be a source of wool and Alberta wool would be used.

His experience in the woollen textile business had been obtained over a period of 7 years while working with his father who was managing director of the largest mill in Russia. He felt the greatest need of the advantages needed to operate a woollen mill successfully, and such an enterprise would help the town. He regretted his inability to be present and wishing him success. Lack of initiative, said the speaker, had probably been the cause of no woollen mill had yet been established in Alberta.

Although he had formed the company as the Alberta Woollen Mills Ltd., no directorate had been appointed or prospectus sent out, for the reason the location had not been decided on. The president of the board, he stated, was supporting the project and would aid in the financing, after certain capital had been assured. By establishing a mill in Lacombe other subsidiary industries would follow, thereby creating additional payrolls, and as a matter of fact he had received definite assurance that a knitting mill would start operations after a woollen mill had been established here.

It was necessary to have a large facility for the site decided on for the erection of what is known as a two set mill. He asked for the moral support of the project from the Board of Trade, and mentioned the sale of stock would be a provincial wide proposition. The amount of land required for the site would be about 3 or 4 acres.

After a questioning period called by the chairman, a wool grower cited that the project would be of considerable benefit to the producers as they would receive approximately one-third more for their wool. Several questions were put to Mr. Williams who showed a desire to give all the information he could. A resolution was finally drawn up which was moved by G. E. DeLong and seconded by W. F. Puffer, and unanimously carried, reading as follows: "That the Board of Trade appoint a committee to interview the president of the town of Lacombe, relative to securing a site for the proposed mill and report back to the executive of the Board."

The committee appointed to interview the president were: President Henry Trame, W. F. Puffer, G. E. DeLong along with W. J. Williams.

Haynes

Winter has arrived but the farmers around here were lucky enough to get their threshing all done before the storm. The yields were good but the grades were poor on account of the frost.

Miss Margaret Semple left last week for the Old School of Agriculture, where she will take a course in Household Economics, having won a scholarship last spring.

Owing to Mrs. Lakeman having sickness in her home the October meeting of the ladies' aid was held at the home of Mrs. Moorhouse. Arrangements were completed for the bazaar and chicken supper to be held in the hall on November 8. A musical program will follow the supper. After the business meeting a presentation was made to Mrs. Sherbourne, one of our members who is leaving the district.

The Garvin family of Botha visited with relatives at Haynes on Sunday.

A dance will be held in the Hall at Haynes on Nov. 1. Music by Rolfs orchestra.

Mrs. Gray and her pupils of Hopevale school are planning a Halloween party to be held in the hall at Haynes tonight, Oct. 31.

Three District Seed Fairs For The Province

Instilling a new policy calculated to enlarge the scope of the annual Alberta provincial seed fair, Hon. W. N. Chant, minister of agriculture, has announced that the seed fair will now be reorganized to provide three district fairs for the province, instead of a central fair at one point only. These three fairs, it has been decided, will be held at Lethbridge, Calgary and Grande Prairie. A provincial championship to each class will, however, be provided, for by arranging that the first prize winners at each of the district fairs will be permitted to compete in a championship contest at the district fair last to be held, which this year will be at Calgary. As prizes for the championship classes, the first prize monies awarded in each class will be duplicated.

The division of the provincial event into three district fairs will, it is felt, bring the benefits of the project to the farmers, and provide an opportunity for a greater number to participate in the competitions, thereby greatly widening the influence of the project as a stimulant to the production of high quality seed grains.

The work of the junior seed grain clubs throughout the province will be linked up with the district seed fairs by having the efficiency winners of the junior clubs brought in to their respective district fairs for special competitions.

It has been decided also to hold agricultural short courses in conjunction with the district exhibitions. These courses will be entirely educational, particularly in the subjects of farm crops and culture practices, but dealing also with live stock subjects. Lecturers from the university of the province and federal departments of agriculture who may be available at the time will be asked to contribute to the programme of these courses.

It is the plan to have the organization of each district seed fair placed in the hands of the district agriculturist or some sponsoring organization such as an agricultural society or board of trade who will accept the responsibility. In this way it is hoped to obtain the full cooperation of the community and business interests of the respective districts in making the events a success.

Announcement regarding dates of the district fairs will be made later.

Everything Dates From The Flood

In the State of Vermont, and particularly in the Winooski Valley, everything dates from the Flood. Not the deluge that made Noah famous but the flood of 1927 when many lives were lost and millions of dollars worth of property destroyed.

Since Robert Ayre in the C.N.R. magazine called the bridges and line were washed away but in three months trains were again steaming through the State. The residents of towns in the devastated area thought it would take a year, and the return of the engine whistle was a never-to-be-forgotten sound. Today there is no sign beyond "high-water marks" on station buildings and in the farmhouses of this beautiful Winooski Valley.

Around The Town

The sub-executive of the Lacombe Presbytery W.M.S. will meet at the home of Mrs. P. A. Rainsworth, east of Lacombe, on Friday, November 8, at 2:30 p.m. Reports will be received from the various department secretaries at that time.

Jim Brown dropped in during the week to extend greetings and good wishes to the editors. Jim, late of Calgary, and now residing in Edmonton, will be remembered by all followers of the puck-chasing art of several years ago, when he was invited to play for one of the big time clubs and had to politely refuse for business reasons.

The number of visitors to the town this week increased, and one hotel had to hang out the S.H.O. sign on two successive nights.

The regular meeting of the Women's Institute will be held at the home of Mrs. H. Howe on Saturday, Nov. 2 at 3 p.m. Committee: Mesdames Thompson, Roberts, Millard, Vaughan. Don't forget your "Surprise Box."

The Young Ladies' Guild of St. Cyprian's Church, Lacombe will hold a dance in the Adelphi Hotel on Friday night, November 1st. Tickets 50 cents including lunch.

Mr. Young, editor of the Grand Prairie Herald, was a visitor to Lacombe this week.

The Annual Armistice Dance will be held on Friday, November 15 in the Adelphi hotel. Proceeds to go toward the upkeep of the Memorial Park. Good music and refreshments. Admission 50 cents.

Mr. and Mrs. W. L. Elliott and Mrs. Elliott's sister, Miss Pye, who spent the summer months at Gull Lake, left on Monday for Victoria, B.C., where they will reside for the winter. It is their intention to return again in the spring.

Norman Jaques, member-elect for the Wetaskiwin riding in the Dominion house, was a visitor in Edmonton Friday.

Mr. and Mrs. Fred J. Ramsey are leaving shortly for the States. They intend to visit Washington, Ore., and the Central States, returning in the spring.

Men's Club Outline Plans for the Winter

An executive meeting of the Men's club was held on October 20th to outline the club's activities for the winter season. The present officers of the club are: S. J. Boyd, president; C. D. Marble, vice-president; L. P. Minkler, secretary.

Executive: J. S. McCormick, C. E. Todd, J. H. Lamont, Thomas Wilkes and A. Robson Rhind.

This club was organized early in the year under the auspices of the United Church but was later extended to include membership from all denominations, properly proposed, and its aims are to promote good citizenship, develop the art of public speaking among its members and generally to conduct its meetings along educational lines.

During the spring season several luncheons were served at which the guest speakers were: Rev. Robert H. Layton, Allan D. MacDonald, David McDonald, Dr. E. M. Sharpe and Charles M. Laverly, B.A.

No membership fee or dues are required and the club is most anxious to count among its members the young men of the town. From an initial small handful of those who organized the club, a membership of 80 was attained before the season closed.

It is proposed to hold dinners on the first and third Tuesdays in the Church Hall throughout the winter season. At its first meeting officers will be elected for the ensuing year.

Increase in Trade With New Zealand

New Zealand is buying from Canada increased quantities of motor vehicles, tires, iron pipes, a fish, silk and artificial silk pieces, flour, gum boots, iron wire, leather footwear, agricultural machinery, cardboard and similar goods, and adding machines, a comparison of figures for the first six months of this year as compared with the same period of 1934 shows, according to traffic officials of the Canadian National Steamships, a great portion of the products enumerated had been carried in vessels of the line in the direct Canada-Australia-New Zealand service.

Rimby News

Six babies, a number which broke the record during any one week, are receiving an excellent start in life at the Rimby hospital.

The Thanksgiving chicken supper sponsored by the W. A. of the church of the Epiphany, Rimby, was a decided success and well attended. Gross proceeds from the supper, dress and sale of a fruit cake, amounted to \$84.00. G. L. Newson was the holder of the lucky ticket No. 38 on the cake.

Mr. and Mrs. Thos. Wright and Miss Irene Wright spent Monday, October 28, in Red Deer.

C. F. Dannon was a business caller in Rimby on Monday.

Miss Ewen Halpin, R.N., Jack and Barney Halpin, of Lacombe, spent Friday in Rimby, guests of Dr. and Mrs. H. E. Halpin.

Thousands of ducks have been feeding in the stubble fields in the Rimby district this season. Many of the mallards brought down are nearly as large as tame ducks. A canvas back, bagged by A. B. MacDonald, is the first bird of that variety to be seen here in ten years.

Mr. and Mrs. W. E. Johnston entertained delightfully at dinner on Monday evening last, in honor of Mr. Johnston's birthday anniversary. Covers were laid for ten.

Dr. and Mrs. A. E. Auger, Dr. Wm. Auger and F. E. Auger, all of Stettler, were guests of Mr. and Mrs. S. M. Auger last Sunday.

Miss Margaret Archibald of Ponoka, Lorne Lewis and Arthur McFarlane of Lacombe, spent Sunday at the Auger home northeast of Rimby.

Wild Barley

Skunk-tail grass, or wild barley, is a native perennial occurring from Lake Superior westward, particularly in alkaline soil where better grasses cannot thrive. It is found occasionally in Eastern Canada. This grass is a serious enemy to western stockmen, being a source of injury to horses, cattle and sheep through the barbed seeds and awns penetrating the soft tissue of the animals' mouths and causing irritation and inflamed ulcers.

Pretty Wedding Takes Place in Lacombe

A very pretty wedding was solemnized on Thursday last at the home of Mr. and Mrs. B. S. Cameron when their daughter Helen Lila was united in marriage to Mr. Alvin Grant Sanders, son of Mr. and Mrs. W. M. Sanders of High River, in the presence of immediate friends and relatives.

Precisely at twelve o'clock the bridal party stepped to the arch made of white bells and chrysanthemums. The bride's gown was of blue crepe trimmed in silver and she carried a bouquet of roses.

Following the ceremony which was performed by Rev. P. E. Mundy of Red Deer, luncheon was served after which Mr. and Mrs. Sanders left for Calgary for a short honeymoon then leaving to take up residence in Claresholm where Mr. Sanders has a position with the Claresholm Pharmacy.

The bride's going away outfit was wine colored dress coat and hat with black accessories.

Out of town guests were Mr. and Mrs. W. M. Sanders, Alma, Neryva and Dorothea Sanders of High River, Mr. and Mrs. K. Watson of Blenheim, Ont., Mr. and Mrs. J. H. Cameron of Chatham, Ont. Dr. and Mrs. L. C. Watson, Cameron and Wilma Watson of Edmonton, Mr. and Mrs. Sanders will be at home to their friends after the first of December.

Canada's Beef Consumption

The present consumption of beef in Canada per head of population is estimated at 68.06 pounds (36.09 in 1933); pork, 66.36 pounds (71.58 in 1933); mutton and lamb, 6.24 pounds (6.32 in 1933); poultry, 9.9 pounds; butter, 30.92 pounds; cheese, 3.64 pounds; eggs, 22.31 dozen per capita.

The Relief Expenditure Burden

With the Federal elections over and the political complexion of the next Parliament of Canada defined, the government of the country will be faced with a number of important problems to decide, and not the least of these is the question of the steps which must be taken to ease the debt burden of governmental units in Western Canada.

By governmental units is meant the governments of the provinces and of the municipalities, urban and rural.

During the past five years the public finances of the Western Canadian provinces and of the municipalities, which are their creatures, have been strained to the breaking point to meet the problems which drought and general unemployment have brought in their train.

Not only has the public purse of the Western provinces and of the municipalities been depleted in the struggle to ensure that their citizens should not starve, freeze or go shelterless in their grim fight against great odds, but they have been obliged to pledge their future resources, to an alarming extent, to enable the citizens of the present generation to keep their heads above water.

In the three prairie provinces millions of dollars have been spent to furnish a substantial percentage of the population with food, fuel and clothing, and in the urban centres with shelter as well; and this, despite the fact that the Federal government has also contributed large sums to bolster up the provinces and the municipalities in their fight to ensure the necessities of life for their people.

In addition, however, to the money which has been expended out of current revenues these provincial and municipal governments have pledged many more millions of dollars against the credit of the future earning power of the people, a debt which will have to be liquidated in the future either by the taxpayers of to-day or by the rising generation, or a combination of both.

Without going into statistics which, at the best, make dry reading, it is axiomatic to say that the indebtedness which has been piled up on this count, directly and indirectly, reaches a staggering total and has passed the figure which is within the competence of these governmental units to meet from existing resources.

One of the conditions contributing to the existing condition of the finances of the Western provinces and municipalities is the inequity of the distribution of the tax burden as between individual taxpayers and the inequity of the distribution of the bases of taxation as between the federal, provincial and municipal governing entities.

The financial situation which has developed as a result of these inequalities is one which will have to be faced and remedied by the newly-elected Parliament if the Western provinces and municipalities are to remain solvent and are to be enabled to extricate themselves from a position which has become intolerable.

So far as the municipal governments are concerned, their financial plight has been accentuated by practical limitation to really as, at least, the principal tax base, and this applies to both rural and urban, only in different degree. Land has more than passed the limit of its endurance as a source of revenue for governments. Other sources of taxation are denied to the municipalities, and this is one discriminatory feature which will have to be remedied.

In seeking additional sources of revenue municipalities are cramped by legislative action of their superior provinces and the provinces in turn are hampered by Federal authority.

What is needed is a nation-wide conference in which the municipalities can get together with the provinces and the Dominion and, in a spirit of tolerance and recognition of the difficulties of one another, come to an agreement which will provide for specific delimitation of spheres of taxation and a definite understanding that the several governmental units will not in future encroach upon one another's taxation preserves.

This understanding should be translated into legislative enactment and if it involves amendments to the British North America Act, so undoubtedly it would, efforts should be made to secure the necessary sanction.

The problem of relief, it has been reiterated by competent authorities time and again, is a national one. The provinces have said so. The urban municipalities have said so and the rural municipalities hold the same view, even if they have not adopted resolutions in convention to that effect.

If the Federal government is not prepared to recognize the situation in the west as a national problem, the only alternative is for the Federal government to make it possible for the provinces and municipalities to liquidate past, present and future expenditures by providing them with the machinery to levy the money where the money is available.

Serum For Paralysis

Demonstration Is Made Of New Treatment For Dread Disease

A serum he said was as positive and effective in the treatment of infantile paralysis as the serum widely used in treating diphtheria was demonstrated by Dr. E. C. Rosewood of the Mayo Foundation, University of Minnesota, before members of the Kentucky State Medical Association.

The serum, Dr. Rosewood told the assembled physicians and surgeons, is the result of 19 years of experimentation and while it does not completely solve the problem it is effective when used within 48 hours after the disease is contracted. Within that period it is as effective and positive as the serum used for diphtheria, Dr. Rosewood said.

Dr. A. T. McCormack, secretary of the Kentucky state board of health, said the demonstration made by Dr. Rosewood was "pretty conclusive."

One copy of every book published in England must by law be supplied on demand to certain specified libraries, including the Bodleian Library at Oxford and Cambridge University library.

Planting Thousands Of Trees

B.C. Replanting Areas Where Fires Destroyed Growth

British Columbia will plant 500,000 tiny fir trees in logged-off lands during the next year, under a planting program laid down by the provincial government.

These seedlings, now being raised in the government's nursery east of New Westminster, will cover 500 acres, 1,000 being planted on each acre.

The cost will vary from \$10 to \$15 per acre, including the expense of growing the little trees, now about six inches high.

Fortunately nature is rebuilding the forests of British Columbia on a scale economically beyond the means of the government. The artificial planting can be used only in strategic spots where, after repeated fires, new timber is not growing in forest reserves.

Where foresters are growing seedlings now with the care usually bestowed on garden roses, and will be able to cover only 500 acres, fire destroys on the average about 100,000 acres of young trees every year, most of them older and better than the planted stock.

Kitten Holds Up Traffic
A playful kitten held up traffic for a time on the highway near Nanaimo, Ontario. It romped across the road into the path of an approaching bus and another automobile. It didn't want to leave the traffic lane. Both drivers stopped their vehicles to allow the kitten to scamper to safety.

Spars For Royal Yacht
Two huge spars of Douglas fir, one 103 feet and the other 90 feet, dressed, have been shipped from Cowichan Lake to Great Britain, where they are destined for His Majesty's yacht Britannia.

Weird Collection Of Plants

Gathered From All Over World By Paris Museum

Strange plants that eat meat and have stomach aches are among the latest botanical collection gathered from obscure corners of the world by the Paris Museum of Natural History.

These carnivorous plants, which thrive on the meaty substance of flies, mosquitoes and other insects, are being divided by French scientists to-day into different classes according to digestive organs and methods of food-catching. It already has been discovered that some of them can be fed by hand and will devour tiny pieces of beefsteak.

Included in this weird collection are bladderworts, pitcher-plants, Venus fly-traps, sun-rews and scores of other varieties that so far are known only by Latin name. Some of them have small pits and cavities into which unsuspecting little animals (even) only to find themselves prisoners, doomed to be made into a meal. Others capture their food with the aid of a sticky fluid while still another group has mouth-like leaves with which to snap up food.

Practically all of these insectivorous plants have been gathered by French scientists in bogs, marshes and damp heaths, which are stated to be their natural habitat. Since their roots have no contact with sufficient supplies of inorganic food, these plants have been forced to develop their stems or leaves into veritable mouths and stomachs.

One of the most curious plants being studied at the Museum is the pitcher-plant belonging to the genus *Nepenthes*. Different varieties of it have been brought from swamps and jungle pools of New Guinea, New Caledonia, Madagascar and Cochinchina. From its stem dangle leaves which have a large pitcher-like cavity at the end. These pits vary in size from a few inches to more than a foot in depth. Usually spotted with yellow, purple and red and lined with sweet-smelling honey glands, these pitchers attract any insect winging by.

Unaware of any danger, the fly or beetle slips the tasty secretion and tumbles forth into the trap. Then it suddenly finds itself sliding down a slippery track into the bottom of the pitcher where its presence stimulates a flow of fluid, which drowns and digests it. The creature is then gradually absorbed by the plant.

When one of these pitchers is too large a morsel and proper digestion cannot take place, disorders similar to the stomach aches of human beings result.

Connected With Tragic Story

Pistols Given As Present Caused Death Of Recipient's Son

The story of a son sent to his death by his father's treachery to a request for advice is behind a brace of pistols on exhibition in the Donaid Ross McCord museum, Montreal. They were presented in 1759 by Major-General Jas. Wolfe, British hero of the Plains of Abraham, to Capt. Samuel Holland, at that time connected with the 49th Regiment in Quebec, and afterwards surveyor-general of Canada.

Some years later Holland's son was quartered with his regiment in Montreal. Among the officers of the regiment was a noted duellist, who had earned himself a name as a bully. Apparently for no reason, this man trumped up false charges against young Holland, accusing him of interfering with his wife.

Frightened at the seriousness of the accusation and the possibility of having to face an expert duellist, Holland wrote to his father in Quebec, asking advice. As answer the son received the brace of pistols, which had belonged to General Wolfe.

Bowing to his father's wishes, the young man accepted the challenge. The "affair of honor" took place at Point St. Charles, with the expected result. Young Holland was killed, but the family name was saved.

The pistols were handed down from generation to generation in the Holland family and at length given to the museum.

Indians Honor Priest

Indians from miles around gathered near McBride, B.C., to pay their last tribute to Rev. Father E. A. Allard, Roman Catholic priest, drowned in a canoe accident. They formed an impressive sight as they filed past the grave and three handsets of earth on to the coffin.

Londoners became so unaccustomed to carrying umbrellas during weather that on a recent wet week-end they left 1,158 umbrellas in buns, tubes or trams. This was a record.

"How long have they been married?"
"About five years."
"Did she have a good wife?"
"No, but she made him an awful good husband."

Approximately 80,000 bees must visit at least 3,560,000 flowers in the course of a day to produce one pound of honey, according to estimates of apiarists.

Yarns and fabrics are being produced from paper in Germany.

Added To Honor Roll

Another Set Of Men Prove Heroes In Scientific Tests

Another dauntless set of men has been added to the honor roll of heroes who have risked their lives in scientific tests for the sake of humanity. The latest heroes are Dr. J. F. Corson of Tanganyika, Africa, his assistant H. C. Smith and an African native.

The problem was whether the tsetse fly disease of sleeping sickness, when it had developed in a human being and had afterward been transmitted from him to another animal would retain sufficient virulence in that animal to infect man again. In the course of several experiments all three allowed themselves to be infected with the germs of sleeping sickness. Their chance of recovery depended on a drug and happily it proved effective.

Strange City In Arabia
Streets Of Lamu Lined With Ruins Of Many Palaces

Lamu, an ancient Arabian city of mystery, is built on a little island not far from Mombasa, in the Kenya Colony. The streets of this strange municipality, which are so narrow that the sun scarcely ever shines in them, are lined with the ruins of many palaces. The inhabitants of Lamu are descendants of the old Persians who founded a colony on the island about A.D. 700, and are very proud of their aristocratic origin and traditions, for more than a thousand years ago their ancestors had produced great poets, architects and jewelers. The population makes a living by cultivating coco-palms, by fishing and collecting ambergris.

If You Eat Starches Meats, Sweets Read This

They're All Necessary Foods—but All Acid-Forming. Hence Most of Us Have "Acid Stomachs." At Times, Easy Nausea to Relieve.

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really acid indigestion—brought about by too much eating of every day type of modern diet. And that there is now a way to relieve this... often in minutes.

Simply take Phillips' Milk of Magnesia after meals. Almost immediately this acts to neutralize the stomach acidity that brings on your trouble. You "forget you have a stomach."

Try this just once! Take either the familiar liquid "PHILLIPS'" or the convenient new Phillips' Milk of Magnesia Tablets. But be sure you get Genuine "PHILLIPS'."

Also in Tablet Form: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores. They are the equivalent of the liquid form, but are more convenient to carry and use.

Beauty In Old London

Pictures Of Infinite Variety Can Be Seen From Great Bridges

Old St. Paul's, perched high on Ludgate Hill, once a commanding position, is being gradually crowded out by other buildings. The most impressive sight of Wren's venerable cathedral is that looking from Fleet-street up Ludgate Hill, I have heard jaded newspaper-men, familiar with Fleet-street at all hours of the day and night, grow lyrical about the loveliness of that glimpse of St. Paul's at dawn.

A great white London seems to have sprung up like magic. But it has not obliterated the past, and one of the charms of a walk through the city is the unexpected glimpses one gets through its narrow courts and alleys of old taverns, little shops, and ivied churches that have stood unchanging through the centuries.

It has been said that one cannot walk a hundred yards in London without seeing a bunch of trees. That is almost completely true. In fact, there are enough trees in the London streets and squares to make up, if placed together, a very respectable forest. Who has ever noted that there are over seventy trees in the Strand?

But nothing excels the river views. Wherever one looks, or from whatever angle of the seven great bridges from the Tower to Lambeth, there is picture after picture of infinite variety and beauty. At night, when the Embankment marries with its thousand lights, the view from the bridges of London's curving waterfront has the quality of pure magic. No Whistler nocturne could do it justice.—Overseas Daily Mail.

SMART DRESS FOR LARGER FIGURES

By Ellen Worth

The jacket collar particularly suggests youthful line. What a lovely feeling getting into a new dress on crisp fall days. This season they seem to be munter than ever.

To-day's model is a charming style for women of fuller figure, for it has slenderizing qualities with its V-neck, jacket collar and has bias seams across the hips.

The original was in dark plum lightweight woolen with matching tonal lustre satin collar.

The two surfaces of black satin back crepe would work out beautifully in this case, made model.

Black wool-like silk crepe with white satin collar is also a very smart scheme for fall.

Style No. 1 is designed for sizes 36, 38, 40, 42, 44, 46 and 48-inches bust. Size 36 requires 4 yards of 36-inch material with 1/2 yard of 36-inch contrasting for three quarter sleeve dress.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg.

Let the new Fall and Winter Fashion Magazine assist you in assembling your family's fall clothes. There are designs for every type and every occasion. And of course one of our perfect-fitting patterns is obtainable for every design illustrated. Don't delay! Send for your copy to-day!

Norway Has Queer Tax
"Sparrow tax" is a levy most annoying to the farmers of Jektylen, Norway, and is one of the most unusual in Europe. For prayers offered up by the pastor of the Nyirken Church at Bergen against crop rustation by the birds, each farmer must pay 30 kroner annually, or about \$7.50. The titlers of the soil say that they receive little for their money, since the sparrows continue to attack the harvest.

A British anatomist has advanced the theory that while brains develop, teeth rest and that many men with defective teeth have more than ordinary brain power.

Why do they call it a grandstand when everybody sits down?

O.K. BY ME!

"Fresh and mellow, lasting, too, Dixie Plug is the smoke for you. I've tried them all and I'll agree That Dixie Plug's O.K. by me!"

Making An Empire

Britain Did Not Accomplish It By Force Of Arms

Signor Mussolini adroitly sought to weaken the influence of British efforts to avert war with these words: "My only desire is to serve my country as did the great Englishman, who built up the British Empire."

But the great Englishman, lacking aeroplanes and poison gas, went into the unknown lands, not in vast numbers, but in small parties. Once a few of them came to Australia with a man named James Cook. They did not blow the aborigines to pieces with cannon, but found it sufficient when opposed to fire a few pellets into the legs of a hostile native. That was the invasion of Australia. It can hardly be described as a conquest by force of arms. True, here and there in the Empire there has been fighting, and in the dark past deeds have been done which people of British blood would not dream of doing to-day, but it is to the solitary explorer and to little bands of navigators that the making of Empire must be credited.—Melbourne Australasian.

Crickets On The Hearth

Housewives In English Village Have More Than They Want

Wives of miners at Devon village, Atherstone, Warwickshire, England, have had to leave the doors and windows of their houses with putty to keep out crickets, swarming in thousands. Scores of villagers have been out at night, armed with nails, pulling the insects on walls and pavements, shovelfuls being swept up in the morning.

The villagers have been afraid to go to bed, insects by the dozen crawling over their faces. Every room in some houses has been infested. Windows have been stripped of paper and doors and window-frames removed to eradicate the pests. The insects have contaminated food by day and rendered nights hideous by their chirping choruses.

The pessimist is the advance agent of what never happens.

Fairly Complete Menu
Edward McCaffrey, purser of the cruise ship Tadoussac, thought he had been transferred to the culinary department when he looked at recent reservation card. On board as passengers he had Mr. and Mrs. Fish, Mr. Roast, Mr. Jelly and Mrs. Saiter. "A fairly complete menu," decided Mr. McCaffrey.

One hundred sixty-six thousand acres of land were set aside by China for an experiment in raising cotton from American cotton seed.

The aeronautics industry in the United States produced \$44,000,000 worth of aircraft and parts in 1934.

Free Samples of Vick's Aids To Better Control of Colds Offered by Local Druggists

Trial Packages Contain Vicks VapoRub and a Home Guide to Fewer and Shorter Colds—Druggists Also Have Free Samples of Vicks Medicated Cough Drops

Thousands of Canadian families have already gained greater freedom from colds—with the help of the famous Vicks Plan for Better Control of Colds. Developed by the makers of Vicks VapoRub, this home guide to fewer and shorter colds is commonsense and medically sound. It is based on 30 years of practical experience and research by Vicks Chemists, specializing in the study of colds. Its worth has been demonstrated not only in everyday home use, but also in extensive clinical tests under medical supervision.

And now—to introduce Vicks Plan to more families in this section—local druggists are distributing free trial packages containing complete details of the Plan and samples of the Vicks Colds-Control Aids.

Aid in Preventing Many Colds
Discovery of Vicks VapoRub, unique aid in preventing colds, made Vicks Plan possible. Especially designed for the nose and upper throat—where most colds start—it soothes and stimulates Nature's own functions to prevent many colds, and to throw off head colds in the early stages.

VapoRub is easy and convenient to use—any time or place. Just a few drops up each nostril at the first nasal irritation, sniffle or sneeze. Used in time, it helps to avoid many colds.

Family Standby for Relieving Colds
If a cold has developed or arises without warning, Vicks VapoRub—the family standby for relieving colds—helps by rubbing on the throat and chest at bedtime. VapoRub acts two ways at once: (1) By stimulating the throat, like a poultice or plaster; (2) By inhalation of its penetrating medicaments vapors direct to inflamed air-passages.

Through the night, this combined vapor-soothing action loosens phlegm, soothes irritated membranes, helps break congestion. Often by morning, the worst of the cold is over.

(Ever since the introduction of VapoRub, millions of people have used it as they would a cough drop, by melting a little on the tongue. Now, in Vicks Medicated Cough Drops, the throat-soothing ingredients of VapoRub are available in convenient candy form—a really medicated and distinctive cough drop.)

Get Your Free Samples Today
Don't forget—your druggist has a few free trial packages of these Vicks Aids to Better Control of Colds for you today, before they're all gone. The free packages contain all the information you need for following Vicks Plan. Test the samples then prove what Vicks Plan can do for you and your family. You'll find it easy to follow in your own home.

Youth From Many Lands Give Views On How To Maintain Peace of the World

The following quotations are extracted from essays submitted to the New History Society in its three competitions offered to students of the universities and colleges of the United States, Europe and South and Central America, Mexico and the West Indies, on How Can Colleges Promote World Peace? How can the Youth of the Universities and Schools Contribute to the Realization of a United States of the World? How Can the Youth of the Universities and Professional Schools Contribute to the Reconstruction of the Human Commonwealth?

Keep alive the will to peace and the will to sacrifice for peace.—Australia.

The nations must abandon the principle of colonization, which consists of enriching themselves at the expense of the colonized peoples.—Belgium.

Youth must free itself of excessive respect for dead traditions and rouse itself from the contemplation of idols which it needs must detest.—Brazil.

Let us irrevocably refuse all military service.—Bulgaria.

Wholesome ideas can develop only in the sunlight of liberty, which turns to dust everything inimical to the natural principles of the peoples, who of themselves know the best remedy for their wounds.—Cuba.

Turn to the youth which, wants peace and a better life, the old do not understand.—Czechoslovakia.

Through the industry of youth at the universities and schools, through the donations of the rich, the United States and the world should, within a few years, become a reality.—Denmark.

Humanity can be better served by youth at a low cost than it has been by mature generations at a high cost.—Ecuador.

The creation of the United States of the World depends on mutual understanding, and this will only be possible through the use of a universal language.—Estonia.

Let youth believe, now and always, that other nations also seek that which is beautiful, true, just and right.—Finland.

Let the nations die so that humanity may live.—France.

Our goal is peace and the realization of the United States of the World. We wish to enlist in the service of this ideal, and, in its name, become the heroes of peace.—Germany.

Warfare will continue just as long as public opinion does not object.—Great Britain.

Youth! Unite if you wish to succeed.—Greece.

Promote among the youth those virtues which will make them citizens of the United States of the World.—Holland.

It is impossible to realize the United States of the World so long as absolute sovereignty and independence prevail.—Hungary.

Boycott the lectures of professors who, sympathetic with militarism, develop a vast agitation against war.—Italy.

If youth understands itself to-day, it will unite the world to-morrow.—Jugoslavia.

Youth holds in its hands the key to the United States of the World.—Latvia.

The youth of the colleges and schools must be united in an International Student League.—Lithuania.

We certainly need new teachers; otherwise the youth will sing the same old songs.—Luxembourg.

Our first duty is to believe in the good will of others.—Norway.

Man! Be a citizen of the world!—Poland.

The Franco-German problem is the most important of all. If it were settled, confidence would be re-established in the whole world.—Portugal.

Youth must free itself from the prejudices of a bankrupt society.—Rumania.

Cutting The Cost

Two Students At University of California Living In Trailer
Housed in an automobile trailer on a vacant lot, two University of California students are launched on what they termed a portable education. The higher cost of living and learning was virtually wiped out by the arrangement, declared the students. Expenses are \$150 a month for electricity, for which the trailer has been connected with Berkeley's regular power system, plus \$50 a year rent for the ground.

All That Was Left

A city family has been motoring in the country all day Sunday. They had filled all the available space in the car with wild flowers, tree branches, and other spoils. Being uncertain which road to take, they stopped a farmer and inquired: "Should we take this road back to the city?"

"You might as well while you're at it," replied the farmer. "It looks like you had about everything else we've got."

One town in Scotland is named Ca.

Nutritional Problems

American Public Health Association Exposes Some Fallacies
"Acidosis" was branded as Nutritional quackery in a report by a committee on nutritional problems submitted to the American Public Health Association.

The committee report also held that feeding the white of raw eggs in invalids and other similar dietary ideas were without basis and condemned them in a report on "food fallacies and nutritional quackery."

"The great popular demand for information about foods and health during recent years," the report said, "has resulted in an increasing and alarming amount of exploitation of the public by dietary quacks, faddists and self-styled nutrition experts."

"Acidosis" is a term frequently and effectively used by the purveyors of food fallacies. Nearly all the diseases that afflict mankind can be found enumerated as the result of acidosis caused by eating acid foods.

"Elaborate menus are offered for alkali-forming meals, and systems of dieting which can be had by purchasing their books or enlisting their services and special courses. The claim that acidosis will result from eating bread and meat or certain combinations of food, such as proteins and starches or fruits and starches, is entirely unsupported by scientific evidence."

"Acidosis is usually a condition attending certain diseases, such as diabetes or kidney disease, involving faulty metabolism of the body."

"There is no evidence that a preponderantly acid diet is injurious."

Concerning the eggs the report reads: "It has been pointed out by numerous investigators that the white of eggs is much less digestible when raw than when cooked."

"There is even evidence that raw egg white when fed to experimental animals will invariably produce toxic symptoms."

"One of the most common fallacies is that proteins and starches are incompatible and should be separated into distinct and separate meals."

Prairie Butter

Production Now Two And A Half Times Greater Than In 1920
Butter production in Canada's Prairie Provinces has been increasing at a faster rate than the output of the whole Dominion, particularly during the last five years.

In 1934 the production of creamery butter in Manitoba, Saskatchewan and Alberta was 76,148,500 pounds, which represented 28.8 per cent of the total production of butter in the Dominion for that year.

Production in these three provinces in 1934 was two and one-half times that of 1920, while the output of the Dominion as a whole was about double that of 1920.

In the case of the Prairie Provinces, however, a large proportion of the butter output is for export to distant markets, a knowledge of the factors affecting cost is most important. A study of creamery management reveals that the average manufacturing cost was 3.46 cents per pound in 78 creameries, which were grouped according to the pounds of butter manufactured. The average cost of manufacture in plants in which production was under 100,000 pounds of butter for the year was 4.82 cents per pound while in factories having an output of over 500,000 pounds the figure was 3.18 cents.

The range in cost from the lowest to the highest was from 2.62 to 6.56 cents, a difference of 3.94 cents per pound.

Recall Many Incidents

Touching Stories Of Late Queen Astrid Told In Sweden
Stillness, warmth and depth of feeling characterized the grief of the Swedish people at the tragic death of Queen Astrid of Belgium.

Many touching episodes and personal reminiscences of the smiling Swedish princess have been recalled.

When Astrid was a little girl her mother had taken her to the beach to bathe her. The little princess was frightened and cried and her mother scolded her a little for being afraid of the tiny waves.

"But you forget, mother dear," the little girl once claimed, "that I am so little and the sea so big." Prince Carol, her father, adds Astrid was prone to tears also after she grew up because she had a very soft heart and was quite shy.

"I would not be surprised," the Prince says, "if the shipwreck, the first known to Belgium, facing the first unknown in front of her, sometimes repeated to herself the words 'Mother, I am so little and the sea so big.'"

On the initiative of the Archbishop of Sweden a national subscription for a memorial fund in honor of the dead Queen has been started to further work for the improvement of the national health.

Americans eat the heartiest breakfast of any nation on the earth, Canadians come second.

Only one President of the United States was born west of Chicago—Herbert Hoover.

The nation with a bent for war frequently goes broke on it.

Learning To Sleep

Quietness In New York Will Bother Many People
Continuing for an indefinite period many a sleepless head in town will turn from side to side in a vain effort to find a resting place.

"Would it were morning!" It will be New York trying to get used to its noiseless nights. The city will repeat on a comprehensive scale the experience of all good city folk who go to the country for their vacations and cannot sleep in the quiet of the woodland noises or those who move out to the suburbs and have to get used to the early morning birds.

How long the new ordeal of noiselessness will last depends, of course, on the individual citizen's make-up. The sturdy type may need only three or four days to learn to sleep in a quiet city. More sensitive organisms will need as much as a fortnight before they can fall asleep without automobile horns, motor-cycle exhausts, buses going into gear, radio, Central Park serenaders, and always there will be a convivial night party in a neighboring apartment to save one from the dream hammers of utter silence.—New York Times.

Standard Has Been Raised

High Production Expected Making It Hard For Cow
We were reading something to-day about a cow which in a year produced 1,400 pounds of butter fat, and we learn that even that high standard does not entitle the cow to top place in the honor roll.

It was also stated that farmers and dairymen were not well advised to keep cows which would not start moving up toward the higher reaches of production. And that of course may be so, "Weed them out" was the short phrase directed toward the cows which were doing only fair work or something not quite as good as that.

That is a hard sort of phrase from which mercy and sentiment have been stripped.

So we fear if that idea travels it is going to be hard on the cow which runs down to 400 pounds of butter fat during the milking season which can be regarded, we suppose, as the fiscal year of the cow. Under such circumstances it is going to be tough being a cow, much tougher than it used to be.—Stratford Beacon-Herald.

Father took his small son to church. The clergyman announced: "We shall now sing hymn two hundred and twenty-two." Ten thousand and twenty-two.

"Dad, we don't have to work this out, do we?"

The puzzled boy nudged his father.

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

"Dad, we don't have to work this out, do we?"

To Safeguard Motorists

New Device Claimed To Remove Danger From Carbon Monoxide Fumes
Seven years in development, a device perfected by two Winnipeg garagemen will remove from motorizing the menace of poisonous carbon monoxide fumes, they claimed.

The invention, they said, ensures complete combustion. It consists of a small cylinder fitted over the intake in the manifold of an automobile motor at the back of the carburetor. From a small can on top of the cylinder a chemical feeds into the manifold as the motor starts.

The inventors, John Forbes and W. Denny Overall, claim the chemical reduces the amount of carbon monoxide to about one per cent. They estimated it would, with their device in operation, take 12 hours in a closed garage 12 by eight feet to kill a man.

Check Brought Results

Worried because her husband was never at home at night, Mrs. K. Kimura of Osaka, Japan, asked the police if they could suggest a way out of stopping him going out. The police made investigations as to how Mr. Kimura spent his night—and he now faces a sentence of three years' imprisonment. His "nights out" were strictly business—burgling.

Shop Assistant: "We are selling these goods, madam, at ridiculous prices."

Customer: "I should say so. I can buy them cheaper in half a dozen places."

A device enabling engineers to "see" the noise made when a pin is dropped before a microphone has been invented in Southend, England.

The SNAPSHOT GUIDE

THAT THIRD DIMENSION

How many times have you heard the expression "Don't take a picture with your camera facing the sun"? It's one of the old beliefs in amateur photography that has been handed down from year to year to every new snapshotter.

While this is good advice for the beginner it is not necessary to forever abide by this rule. Those of us who like to try breaking such rules have found that most of the work of which we are proud has been produced under other lightings. The important thing to remember is that you must never stand so that sunlight will strike into the lens.

The lighting of the subject has much to do with securing that quality sometimes called "atmosphere" in a picture. There are a number of ways in which a photograph may be given apparent depth or "third dimension." Taking the picture when there are long shadows, getting a reflection in the foreground, using strong side-lighting or back-lighting, and making the exposure so that the detail of objects in shadow is not blocked out, are precautions that contribute to the desired effect. Let us consider each of these separately.

Shadows, thrown in long drawn-out patches across walls and walks, more than anything else, make us feel that he is "in the picture" instead of "looking on" a flat piece of paper carrying the images of the objects recorded.

The foreground should be well broken up with shadows so that there is not too much contrast between it and the rest of the picture. When a body of water can be included as a part of the foreground, then there are wonderful opportunities for adding depth. The reflection will carry one's attention back and away from the foreground—into the picture and lead to the principal point of composition. Reflections often serve as an avenue to lead the eye to more "passage" in the picture. The only precaution necessary when dealing with a water foreground in strong sunlight is to watch that a swell of waves does not throw reflected light sparkles upon the lens, as that may fog the picture.

Side-lighting, where the source of illumination comes from the side of the object or scene, and back-lighting, where the light comes from the rear, are not difficult to handle if the lens is protected from the light coming toward it. Since the lens with the hand, or stand in the picture, the exposure must be made so that the detail of objects in shadow is not blocked out, are precautions that contribute to the desired effect. Let us consider each of these separately.

Graphic Description Of Fury Of Hurricanes That Beset The Caribbean Sea

Handy But Unsafe

Putting Door Key Under Mat Is Dangerous Habit
A couple of houses in the city have been burglarized in the last few days; and it is suspected that the thieves had been watching and, when all the occupants were away, had taken the key from its customary resting place under the front door mat—and the rest was easy. Not likely any of the neighbors would be paying any attention to such a commonplace act.

You may have heard of the lady who, fearing someone would make an unauthorized entry, hid the key and then stuck a note on the door letting her husband know where it was—conveniently counting on her husband being first there. That is probably exaggerated; but there is too much of the confiding spirit when it comes to locking up while the family is downtown. Under the mat seems to be a favorite hiding place; but since dishonest persons as well as honest are "onto it," a change is indicated.

The hiding place of the front door key should be something like the combination of a safe—known only to those authorized to use it. The mat under the door is a public place. There are lots of other places and it makes no difference so long as everyone in the family knows where it is. Of course, the door mat is handy; but does the gain in handiness make up for the increase in risk?

Our own suggestion would be a key for each of the adult members of the household. They would not cost much, and they would assure all interested that they could go out without leaving the place to be ransacked by someone who found the key under the mat.—Owen Sound Sun-Times.

Denmark Is Progressive

Away Ahead Of United States In Reform Measures, Says Mrs. Owen
The United States is just a little child in pinfolds and leadings strings as far as Denmark is concerned.

So Mrs. Ruth Bryan Owen, American Minister to Denmark, reported as she arrived in New York on the American Scantic line's steamer Scannall.

"Denmark, with its Social Democratic government, is way ahead of our New Deal," Mrs. Owen said in her crisp, energetic speech. "The things were fighting for here have been realities, not innovations, in Denmark for years."

"They have," for instance, unemployment insurance, and old-age pensions well established, to mention just two of their reforms."

This was about as far as cautious Mrs. Owen would go in discussing politics, war and diplomacy.

"The only thing I can say is that Denmark doesn't have a war scare; the people keep their feet on the ground in that country," she said in answer to a barrage of questions.

Criticism Was Justified

Employee Took Unfair Advantage Of Firm's Generous Offer
Mr. Armour, being desirous of giving a Christmas gift to all of the department heads of Armour & Co. gave them permission to go to their own tailors and order a suit of clothes and have their tailors send in the bills to him. Mr. Armour was sure, of course, that the men would select business suits.

One department head, however, thought that here was his opportunity of getting something that he had long desired, a cutaway suit with striped trousers.

In course of time the bill for the suit was received by Mr. Armour, who, of course, was very much astonished. He sent for the man, and told him that he had received the bill for a suit from his tailor, and asked him if the bill was correct. He was told the bill was quite correct.

Mr. Armour then said to the man: "Well, I've had to butcher many a hog in my day; but you are the first one I ever dressed."—Christian Science Monitor.

Houses Always Occupied

Really agents have no trouble in renting a group of houses at Augsburg, South Bavaria. Since they were built 415 years ago they have never been vacant. The buildings are among the houses constructed by Jacob Fugger, the German banker, in 1520. They rent for \$1 a year.

Big Motor Lifeboats

Lord Inverclyde declared recently the motor lifeboats of the Queen Mary, the giant Cunarder, can accommodate more passengers than the total complement of the first of the company's steamers, the Britannia.

Geological expeditions are at work in the mountain country of the Caucasus to prepare a new large-scale map of that region.

What men call firmness in themselves they call contrariness in others.

Hurricanes, according to a writer in the New York Times, have their origin in the quietest section of the ocean known as the doldrums near the equator. But until they reach the West they do not gather Titan force.

How the hurricanes actually starts men do not know. They talk of convection and other theories, of upward-moving currents of air, of condensation and pressure, and of air rushing in to sweep in a faster and faster spiral. Finally, centrifugal force make a hole in the centre, where no storm rages and where are slowly ascending currents of air. Those who have seen a hole grow larger and larger in water escaping from a circular washbasin have seen this process at work on a small scale.

But by the time this happens the tropical cyclone, as it is technically called, has got up such a speed that it is a roaring and devouring monster. When it first appears and is reported, generally to the east of the Windward and Leeward Islands at the eastern end of the Caribbean, it may be 300 miles in diameter, the centre travelling at twelve or fifteen miles an hour and the whirling air mass attaining unbelievable speeds. Some of the results have been estimated at 180 to 200 miles an hour—estimated because the wind instruments invariably blow away. The speed has been calculated by the force necessary to push over heavy stone monuments.

It is impossible to stand up in a wind of more than 100 miles an hour, and most hurricanes at this point in their career reach that velocity without half trying. They tear structures apart, whip trees to pieces and sweep them across the settlements, pick up every kind of loose boarding and whirl it through the air at a rate which is as deadly as it is terrifying.

The bending palms and other trees, the shrill whine of the wind through this vegetation, and the deep growl of heavier currents as they race across a town make every human and animal thing realize how puny is their force against the storm. There is a constant cannonade, as though the air, thick with rain, were driven across a town, were a battery of field guns laying down a barrage. It is impossible to stand, the vision is constricted to a few feet, and the senses are numbed and dulled by the senseless pounding of wind pressure.

If one is fortunate or unfortunate, enough to be able to see some feet through the maelstrom of rain and wind, there is a confused sense of the world's drifting by in fragments. Bits of trees, of roofs, of houses slide by on the wind as though they were pieces of paper carried upon the storm; weight has lost its gravitational power, and sheet iron is a floating tissue.

Above all is the howl, the pounding howl, of wind battering things to pieces, plucking at the surface of the earth with fingers that draw and lift and suck into the whirlwind above.

Finally the storm passes, or seems to. There is a lull, and the wind dies to a complete calm in which one may see a piece of paper sucked upward. This is the centre of the storm, the hole in the whirlwind. Perhaps there is clear sky above, the sun may shine down for a moment. There is a peace that is a solace to worn nerves. But those who have been through hurricanes know that this is merely a temporary calm, a lull in the storm, and that the wind will find its way into this silent area plot their way carefully that they may get out on the easiest and shortest storm path—for they know that the storm is coming again.

To live through a hurricane on the coast is to get the full experience of the world gone mad, of the winds of the universe jabbing at the earth with spears of dim and slanting light, of water that pours horizontally across the horizon a few feet away, of tangled bits of woodwork flying by on wings, of thuds and crashes of metal and timber, of trees pierced by silvers of wood, of men and women fleeing from demolished houses and clinging to the base of a tree or pole while the debris of a river world goes by them with insane fury.

May Re-Open Branch
Alberta Provincial Savings Certificate Branch May Again Open At Edmonton

Negotiations have been started between the Alberta government and the federal authorities toward the re-opening of the provincial savings certificate branch in Edmonton. Premier Abernethy stated. The branch was closed shortly after the election, and payment on savings certificates accumulated pending the taking over of the administration by Mr. Abernethy from the United Farmers of Alberta government.

Unable to buy jubilee decorations, residents of Finsbury Park, London, painted on lead sheets the words "Poor But Loyal" and strung them high across the streets.

Fifteen girls students of India recently toured Europe.

Alberta Wheat Pool

MERINO AND CROSS-BRED
The wools of prime interest in international trade are merino and cross-bred. Canada, New Zealand, the British Isles, Irish Free State, Argentina, Uruguay, Chile, and Brazil (which also grows merino) and Spain (which also produces carpet wool) are producers of cross-bred wool. Merino is the prevalent type of wool of Australia, Union of South

Africa, and the United States. Carpet wool is turned out by Soviet Russia, China, India, French Africa, Turkey, Iran, Syria, Peru, Bolivia, Mexico and Ecuador.

BOWLING

Potluck Supper Proves A Delightful Affair

Featuring a new departure in the form of a "Potluck" supper with program immediately following, the Women's Missionary Society of St. Andrew's Church, held a most delightful Thanksgiving meeting on Friday evening, Oct. 25.

Heading the program was an inspiring talk by Mrs. R. Hainsworth, president of the Lacombe Presbytery. Mrs. Hainsworth based her remarks on Paul's admonition "And having done all to stand," and stressed the truth that in the life of a society or of an individual there comes a time when despite every strategy, all progress seems to cease. It is that is the need for a sureness of foundation, which will give the required strength to follow Paul's advice.

"Ten years of Union", a splendid paper by Mrs. A. Gilman, showed the grains and losses of the Women's Missionary Society in the Dominion during the period since Union, and ended with a plea to the members that their thankoffering be not merely a financial one, but an offering of heartfelt thanks for all material and spiritual blessings.

Rev. R. B. Layton gave a brief resume of the early struggles and life of Dr. Alex Robb, a Korean missionary, who recently passed away. The suggestion was made that the United Church Camp at Gull Lake might be made a training centre for leaders for C.G.I.T. groups or other departments of church work.

The thank-offering amounted to approximately \$20. The president, Mrs. U. E. Reeves, presided. A solo, "In the garden" beautifully rendered by Mrs. G. P. Johnston was greatly enjoyed.

Several visitors were present and a new member received. The W.M.S. will heartily welcome any of the women of the congregation who feel they would like to attend the meetings. Interesting programs are always held, and a great deal of work done for missions in Alberta. The November 19th meeting will be held at the home of Mrs. C. E. Todd.

Feeding Practices For Cattle and Steers

At this time of year thousands of calves and steers are going into feed lots in Central Alberta. The profit to be made from these steers will depend, not only on the price of beef and the cost of feed, but also, to a great extent, on the methods of feeding and management. The following feeding practices are recommended by the Dominion Experimental Station, Lacombe.

A mixture of barley and oats is the best Alberta-grown feed ration for fattening stock. When cattle are first put into the feed lot they may be fed equal parts of ground oats and ground barley. After the first month or so, depending on their condition, this may be changed gradually to two parts of barley and one of oats. If barley is not available low grade wheat, although not so good for fattening, may be used instead. If wheat is used it should be coarsely ground and mixed with oat chaff in the proportions recommended for barley.

At first, only two to three pounds of grain per head daily should be fed, and the amount increased at the rate of one pound per head per week until the cattle are on full feed about the beginning of the third month. Calves on full feed will consume up to eight pounds, yearlings ten pounds, and two year olds fifteen pounds or more of grain per head daily.

When legume hay, green feed or prairie hay is being fed it is well to allow all the cattle will eat without wasting too much. Two year old steers will consume from fifteen to twenty pounds daily. When the animals are not making sufficiently rapid gains the roughage ration should be reduced, so they will eat more chop.

As variety in the ration is extremely important, the greater the choice of feed the greater is the chance of success. In order to keep down the feed cost, home-grown feeds should be used to as great an extent as possible. If the feeder has alfalfa or sweet clover hay he will not need to provide for much additional protein in the ration. When no legume hay is available, however, the feeding of linseed oil meal usually results in considerably increased gains, especially with calves. One-quarter pound of this feed should be allowed each animal to start with gradually increasing until the full amount of one-half pound daily is being mixed in the grain.

Good water should be supplied at least once daily; if there is a constant supply before the cattle, all the better. In cold weather a tank heater is good to take the chill off water; this simple precaution will save a great deal of feed in a cold winter.

If it is beds or bedding, we have anything you may need or wish. All felt mattresses as low as \$6.75, layer felt and rolled edge. Steel beds, walnut finish, as low as \$7.50. Springs as low as \$4.75. Lacombe Furniture Store. Advl.

WORLD HAPPENINGS BRIEFLY TOLD

Five hundred British Guiana negroes at a conference in Georgetown, sent a petition to the king through the colonial secretary asking to be allowed to fight Ethiopia.

An educational campaign against gambling will be instituted by the Social Service Council of Canada, it was announced in a bulletin recently released.

A father and son are receiving old age pensions at Duck Lake, Sask., according to the secretary-treasurer of the municipality. The father is 96 years old; his son, 70.

A hurriedly lettered sign, "closed until after the war—gone to Ethiopia," appeared in the window of an Italian restaurant in Soho, one of London's bohemian resorts.

The West Australian Labor party adopted a resolution opposing Australian participation in any war except for defence or in conformity to the expressed wish of the people.

Ottawa city council passed a resolution calling for compulsory armament next Dec. 31 of all permanent civil employees who have reached the age of 65.

Preliminary investigation looking toward establishment of an air line linking Denmark, Scotland, Iceland, Canada and the United States will be begun immediately by a newly-formed company.

The Egyptian cabinet has authorized a credit of £200,000 (about \$1,000,000) for the purchase of war materials and munitions, which it is understood will be made from Great Britain.

Claims X-Ray Eyes

Heavily Bandaged Kashmiri Indian Read Book He Had Never Seen

With his head swathed in bandages save for an aperture for the nose, Kuda Bux, a Kashmiri Indian, read rapidly from a book he had never seen before several eminent doctors in London recently. They included Professor Edward Andrade Quain, Professor of Physics at London University, Dr. J. G. Porter-Phillips, superintendent of the Basildon Royal Hospital, and Dr. C. Jennings Marshall, the surgeon. Dr. Marshall bandaged the Indian placing two lumps of sticky dough over the eyes. On these was laid a large pad of cotton round which a broad bandage was tied over the face, on either side of the nose, and another passed over the mouth. Kuda Bux is known as "the man with the X-ray eyes."

"Last Sabbath," said an elder with gle, "as Kirk was coming out, a drover chieft from Dumfries came along the road whistling as happy as if it was the middle of the week. Weel, oors is a God-fearing set o' lads, and they nearly killed him."

A new type of school has been opened in Tokio, Japan, under auspices of the war department, with purpose of teaching daughters and sisters of army men how to become perfect brides of military men.

Isotopes in chemistry have been compared to non-identical twins in animals.

After being preserved for 20 years, snake venom was found to be as poisonous as ever.

REGAIN VIGOUR quickly

Don't stay low in bodily health and spirits. Do what thousands have done. Take PHOSFERINE. And recapture fresh, vigorous buoyancy.

PHOSFERINE, the great British Tonic, will do that for you, as it has done for thousands in England and Canada.

From the very first day you take PHOSFERINE you will feel better, sleep better, eat better. PHOSFERINE is concentrated energy. You take just a few tiny drops each day... but they are drops packed with new life. Quickly they build you up, soothe your nerves, drive out pains and stiffness, and give you a new lease on life. PHOSFERINE has been remarkably successful in almost countless cases of poor health and depressed spirits. It will prove just as good for you.

PHOSFERINE is splendidly effective at all ages for combating fatigue, sleeplessness, general debility, retarded convalescence, nervous, anemic conditions, indigestion, rheumatism, grippe, neuritis, neuritis and loss of appetite.

Get PHOSFERINE from your drug-gist now—in liquid or tablet form—at the following reduced prices:—3 size, 50c. \$1.00. \$1.50. The 4 size is nearly four times the 3 size, and the \$1.50 size is twice the \$1.00 size.

Doing Important Work

Obscure Seamstress Weaving Silk Strands On Liner's Compass Card

Important contribution to the safety of the new giant liner, Queen Mary, is being made by a little seamstress living in obscurity at Glasgow, Scotland.

She is Miss Edith Rankin, of Ben View street, to whom has been allotted the task of weaving compass strands of silk on the magnetic compass card, made of flexible material.

Lightness with strength are necessary with the compass card and these strands, which must be perfectly even, achieve the purpose. This accomplished, Miss Rankin's delicate fingers then sew on the magnetic needles.

"They have to be adjusted to a thousandth of an inch," Miss Rankin said. "A fractional error in fixing the needles can put a ship far off her course."

Miss Rankin works to this astonishing accuracy with the aid only of ordinary spectacles.

After years at the job she can tell almost instinctively by her fingers whether the magnetic needles are exactly in place.

Ships all over the world use compasses which have passed through her hands. "Does it thrill you?" she was asked.

"I suppose it ought to," was the reply.

New Comet Unorthodox

Carries Tail At Right Angles To Path Toward Sun

Like some gigantic insect hured by the light, the new comet discovered at Yerkes observatory is rapidly approaching the sun and will be nearest to it on Dec. 9, when it will begin swinging away.

This solar game of tag was described at Williams Bay, Wis., by Prof. George Van Biesbroeck, discoverer of the newcomer, who has computed the comet's path.

"At present," Van Biesbroeck said, "its distance from the sun is almost double the distance between the earth and the sun, but on Dec. 9 it will be only one and one-fourth as great."

The discovery was made when an astronomer examined a photographic plate of the Sagittarius ("The Archer") Constellation taken on the night of Aug. 20.

The Biesbroeck comet, the professor admitted, is somewhat unorthodox as comets go. Instead of keeping its tail conveniently pointed away from the sun, it makes the appendage describe a 90-degree angle with the line joining the comet and the sun.

But you'd never know it, Biesbroeck said, in effect. "Its brightness is expected to increase until the middle of December—but it will almost certainly remain beyond observation with the naked eye."

Had Exciting Experiences

British Sea Captain Made Successful Fight With Submarine

Captain David Thomson died suddenly at Montrose on September 12. At one time a commander of sailing vessels, he had ultimately been in steam, and during the Great War had exciting experiences.

On the point of being interned at Hamburg on the outbreak of war, he managed to get away with his ship, although under great suspicion, as he was suspected of being connected with the Secret Service. He took away certain papers containing plans of fortifications.

He was one of the first merchant captains to sink a German submarine, the *U-10*, in the Straits of Gibraltar. Like most merchantmen, he had a gun at the stern of his steamer, and fought till the submarine was in a sinking condition. He received an unscrupled gold watch for this feat, and also a grant of £500 from the merchants of Genoa.

Captain Thomson was 78 years of age.

A Fair Contract

George Stanley, an Arkansas City lawyer, probably will be a better dancer by next spring. He has a contract with his wife to take her to all the dances at the country club this winter. In return, he gets permission to keep his bird dog in the house.

Husband: Who was that you were talking to a whole hour at the gate? Wife: That was Mrs. Smith—she hadn't time to come in.

There are 2,650 recognized soccer teams in Italy.

Relic For Jamaica Museum

Canadian Freighter Draws Up Anchor 122 Years Old

When the merchant ship Canadian Conquerer was bidding an adieu to Jamaica recently, Dave Jones, locker presented the departing freighter en route to Canada from Australia with a keepsake. The rumbling winches of the vessel dragged the "mud-hook" out of the bottom of the Caribbean and brought with it a huge rusty anchor and chain 122 years old. Fouled with marine growth and rust, after nearly a century and a quarter on the bottom of the harbor, the old anchor was swung on board.

Stamped on the anchor with its long crossbar and massive flukes was the date 1813, two years before the Battle of Waterloo. Still firmly attached to the bolt eye were several lengths of heavy chain, each link approximately two feet in length. Jamaica records yielded no clue to the story of the anchor, whether it took its last plunge from the oaken deck of a staunch British sea-warrior, whether it once hung from the graceful bow of a stately merchantman, or whether it performed the prosaic task of holding in place a harbor buoy or lightship.

The Canadian Conquerer took the old anchor to Montreal, but it is being sent back to Jamaica to be placed in a museum there.

Has Travelled Far

Old Wooden Table Looked On By Salvationists As Shrine

Just an old unpainted wooden table—but a table carried throughout the world, a table at which hundreds have prayed—almost the "altar" of the Salvation Army.

In Toronto at Massey Hall the plea of General Evangeline Booth brought many penitents to kneel beside it, just as her father, founder of the army, knelt beside it almost 100 years ago.

On that occasion he uttered words which have thrilled thousands of Salvationists: "I determine that God should have all there is of William Booth."

The table stood in a little Wesleyan chapel in Nottingham and in 1854 General Booth, as a lad of 15, had thrown himself down beside it. And so General Evangeline has taken it with her to every part of the earth. It has become a shrine for Salvationists.

Would Speed Up Instruction

New Style Keyboard For Typewriters Is Advocated

A new-style keyboard for typewriters, designed to speed up instruction in stenography, is advocated by Major H. B. King, technical adviser to the British Columbia school finance commission.

"It has been discovered," he says, "that much of the difficulty of teaching typewriting is due to the faulty arrangement of the keys on the universal keyboard used on all typewriting machines."

The cost to convert a machine to the new-style keyboard would approximate \$12. Major King believes the change, if adopted universally, would mean as much to business as it would to the schools.

Prince Loses Friend

Tutor To Royal Brothers Died Recently In London

The death of Henry Peter Hansell, tutor to the Prince of Wales and his three brothers, was reported recently in a special dispatch to the New York Times from London. Hansell died at Bletchingley, Surrey, aged 71, the dispatch said. He went with the Prince of Wales to Oxford where he acted as his academic mentor, guide and friend. Hansell joined the King's household in 1901 as tutor to the Prince of Wales. He remained in the royal household as gentleman usher to the King.

Saving money for a depression helps to bring one on.

The Ultimate In Quietness

Taking Off Hat Makes Noise In Soundproof Room

The new Hayden Planetarium in New York is so quiet that you can hear a man take off his hat in the place, and when he takes off his coat he makes a distinct racket.

The planetarium, sound-proofed by acoustical devices, was opened Oct. 3 and the tests of its quietness announced.

In terms of decibels, it is 15 times less noisy than the volume of sound which a normal ear can barely hear. Sounding recording instruments showed a jump of five decibels when a man took off his hat in the place.

Used Gold Roadbed

Nevada Train Travelled 67 Years Over Rich Vein

For 67 years the old Virginia and Truckee Railroad at Virginia City, Nevada, has hauled gold and silver ore, with its operators all unconscious a part of its roadbed concealed a vein valued at \$2,000,000.

A section of the railroad, owned chiefly by Ogden Mills, former secretary of the United States treasury, has been moved across the canyon on the Sutro Tunnel Coalition Inc., locally owned, can shaft and recover the new wealth.

Scientists Find Coldest Spot

Temperature In Siberian Town Is Minus 102 Degrees

Soviet scientists have just decided that Di-Mekon, in Eastern Siberia, is the coldest place in the world. This is why. Water thrown from a bucket there freezes before hitting the ground and instead of splashing breaks. The usual temperature there is minus 102 degrees Fahrenheit. But the inhabitants don't mind. On the contrary they complain of the damp in Moscow.

Razor blades from glass have been invented by unemployed glassworkers in North Bohemia, the new blades being said to be sharper than steel.

Make This Curly Eared Dog for Some Youngster

PATTERN 5448

Personality—the chief feature of a good mascot or an adored toy. Here it is in this curly-eared, curly-tailed dog. Maybe he's a Pomeranian, perhaps a spaniel, but he's certainly a full-breed when it comes to being a mascot. His tail is a lovely handle—his floppy ears are seen in as securely even pulling can't dislocate them! And his tail will be just as part as this when you make the dog. For it's properly stuffed. As a mascot, he'd be lovely in a gay print or real loud velvet—a mascot must be heard, of course!

In pattern 5448 you will find a pattern and detailed directions for making the dog, and material requirements. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 178 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Would Irrigate Desert

Rain-Maker Confident His Invention Could Make Sahara Fertile

The Sahara desert is the richest agricultural land in the world. But it has never been properly exploited. This is the opinion of Monsieur J. Dubosc, French scientist, who claims to have invented a machine for producing rain at will.

A "rain tower" of cement, that would rise more than 2,000 feet in the shape of a funnel, is the "rain machine" that Monsieur Dubosc claims would bring refreshing showers.

This tower, which is the small model he wishes to build for the Paris Fair in 1937, works on a hot air principle. Hot air would be sucked up the funnel and condensed around the top, thus creating rain. This hot air would be produced by the sun's rays on a glass house at the foot of the tower.

Monsieur Dubosc explains that this tower, which would be twice the height of the Empire State building, would not be sufficient to irrigate the Sahara.

"Half a dozen 'big' towers would be necessary, but with them the Sahara could be fertilized in a short time," he stated.

The Champion Tea Drinker

Bristol Woman Never Takes Less Than Thirty Cups A Day

The average tea consumption of the people of Great Britain is about five cups every day of their lives. At this figure, tea drinkers and those few who never drink it at all, it is obvious that the consumption must be higher than that. Enquiries recently made in London and elsewhere have disclosed that a daily consumption of ten and twelve cups is by no means uncommon, and that there are many people who habitually drink even more than that. So far the champion tea drinker appears to be a woman living in Bristol who claims that she never drinks less than thirty cups a day, and that she has never been ill in her life. Even Dr. Johnson drank only twenty cups a day.

A Sky-Scraper Man

Measures Seven Feet Six Inches And Is Still Growing

The world's tallest man must surely be Hans Shilliter, who, not long ago at the age of twenty measured 7 feet 6 inches in height. He was examined by doctors who believe that according to his record, he will reach nine feet before he stops growing. It takes six and a half yards of cloth to make him a suit. All his relatives are normal in height. Hans' ambition is to become a film star. A club was founded recently in Yorkshire for men who were over 72 inches in height. They dubbed together to protest against small chairs, instead of leg-room in cinemas, and dwarfed head-room in trains and buses.

Liquor A Luxury

Reported That Prices May Be Boosted In Alberta

The Alberta Social Credit government looks upon liquor as a luxury and plans to boost prices. It will contribute a small additional amount to the small additional amount for their liquor to keep those who are unfortunate in bare necessities. Premier Aberhart said at Edmonton. By increasing prices for both hard liquors and beer the government hopes to secure \$300,000 additional revenue by March 31, the end of the fiscal year.

Encouraging Hog Raising

In order to utilize larger quantities of skim milk and buttermilk within the province the Livestock Branch of the British Columbia Department of Agriculture is initiating a campaign, particularly in the Fraser River Valley, to encourage hog raising. Increased production will be encouraged by financial and advisory assistance.

Civilian: "Well, I see the navy is building a new cruiser." Sailor: "Yes, sir. We build only new cruisers."

A Rumanian company is raising capital to enter the rayon manufacturing field.

Some men never tire of doing good because they never do any.

Carrier Of Disease Germs

Carelessness In Home Is Blamed By Toronto Doctor

Dust on the street may be a nuisance but as a carrier of disease germs, it is practically negligible according to Dr. Gordon P. Jackson, M.O.H. Neither are disease-causing germs transmitted by air to any extent, he told the York County Home and School Council at a meeting in Toronto. In a comprehensive address on communicable diseases, he declared there was too much carelessness in handling of food in the home. The "thumb-in-the-soup" was much too prevalent and frequently responsible for such diseases as dysentery, typhoid and diphtheria. Because of germs often carried through soil fertilization, it was essential that all greens be thoroughly washed. Cups, glasses, bedding and papers were often menaces in spreading disease because they had been contaminated by some person.

With a smile she said, "Good morning!" Without exception, each in turn looked up astonished, pleased, and answered with a smile.

After only a few times of going there, she found that each face would light up with a smile of pleasure and good comradeship when she came in. Even amid the rush of work they would take time and make some pleasant remark.

This game, "a chain of smiles," as she calls it, she has been playing for many years, and her business taken her over most of the United States and into other countries. Waiters, clerks at hotel desks, clerks in stores, post office employees, boot-black, janitors, and scrubwomen, all are her companions in the game; and she has found that a smile is never wasted. — Christian Science Monitor.

Suggests Canned Bananas

English Writer Thinks They Would Suit Lazy People

Praiser of time past may find in the rising imports of tinned fruit salad another reason for denouncing the modern housewife, who lacks patience not only for cooking fruit but even for mixing it, says an editorial in the Manchester Guardian.

"The substitution of grapefruit in cans for grapefruit in their own jackets suggests a similar distrust against people too lazy to peel and scoop out their own," the article suggests. "As for canned oranges, these (as one might almost have guessed) come largely from Japan. They will be sent us artificial oranges soon. There seems, however, to be one field in which the fresh fruit eater can still hold up his head. Nobody is canning bananas on a large scale. Perhaps the reason is that bananas are so little trouble to eat already."

Trans-Canada Air Service

Predicts Establishment Within Period Of Two Years

Veteran Canadian air mail pilot, Capt. A. E. Ingram, told a service club at Toronto that two British air lines are giving definite consideration to establishment of air routes and service from England across Canada to the east. He predicted a trans-continental service for Canada within two years, and pointed out the Dominion already has been constructing a chain of airports across the country.

Captain Ingram said both Imperial Airways and Irish Trans-Atlantic Corporation were considering trans-Canada routes.

First Of Its Kind

A white leghorn hen, owned by George Hermannson, of Webster's Corners, B.C., claims the distinction of being the only hen to lay what poultry experts believe to be the only four-yolked egg ever seen. The egg, larger than average size, was found to contain four yolks when candled at the Consumers Co-operative Association factory, Vancouver.

Smile Never Wasted

A Cheerful Frame Of Mind Is Usually Infective

When a woman entered a certain cafeteria, the first thing she observed was the serious, almost disagreeable, expressions on the faces of the women attendants behind the long counters. None of them even raised their eyes when she asked what she wished.

With a smile she said, "Good morning!" Without exception, each in turn looked up astonished, pleased, and answered with a smile.

After only a few times of going there, she found that each face would light up with a smile of pleasure and good comradeship when she came in. Even amid the rush of work they would take time and make some pleasant remark.

This game, "a chain of smiles," as she calls it, she has been playing for many years, and her business taken her over most of the United States and into other countries. Waiters, clerks at hotel desks, clerks in stores, post office employees, boot-black, janitors, and scrubwomen, all are her companions in the game; and she has found that a smile is never wasted. — Christian Science Monitor.

Appreciates The Editor

Minister Offers A Toast At Editorial Convention

Here is at least one minister who appreciates the editor. At a recent editorial convention, a Kansas minister is reported to have offered the following toast:

"To save an editor from starvation, take his paper and pay for it promptly."

"To save him from bankruptcy, advertise in his paper liberally."

"To save him from despair, send him every item of news you can get hold of."

"To save him from profanity, write your correspondence plainly on one side of the sheet and send it in as early as possible."

"To save him from mistakes, bury him. Dead people are the only ones who never make mistakes."—Wisconsin Press.

An Encouraging Sign

The income of Canadian farmers for the year ending June 30th is estimated by the Bank of Commerce to have been 14 per cent. above that of the previous year. Farm costs were 5 per cent. higher and purchasing power nine per cent.

"The Unknown Port," Etc.

SYNOPSIS

Nancy Nelson is a sub-bell, a girl responsible for the choice of her costume for her coming-out party. Suddenly, the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and miss the path Aurora Tibbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she takes him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There, Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that it is lonely, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to her parents to send all the books they could spare and all they could induce others to let them have.

Nancy's parents and friends gave their liberal support to her request for books, and a small box arrived in due course. Father Adam painted a sign for the library, and the Adams boys worked on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adams, and Nancy go to the private home of Matthew Adams for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the swirling snow they collide with a bus full of school children, which was stalled across the road with its back wheels resting in a snow-filled gully. Their car being wrecked, Jack and Nancy stay with the children and do all they can to help. The next morning Jack sets out for help in the blizzard. He succeeds in finding help, and the party of children and Nancy are rescued. As a result of the experience, Nancy and Jack are seriously ill with pneumonia, but both of them recover.

Now Go On With The Story

CHAPTER XX.

Long as he lived Matthew Adams was never to forget the terror that possessed him when, after hours of tramping snowdrifts, he stepped into that stalled school bus. And, perhaps strangely, his first glance fell, not on Nancy, but on the mound of apparently lifeless children beyond her. Then, all in a breath, they focused on the girl herself—a girl only half clad, her hands drifting mechanically in an effort to bring circulation into a boy's small feet which were, it transpired later, not frozen so badly as her own. Her head, drooping forward on her breast, lifted with difficulty as the door opened, then dropped again, but not soon for Matthew to have seen the glassy look that clouded her blue eyes.

For Baking

QUAKER NATURAL BRAN IS
More economical—Gives better results

TRY THIS SUGGESTION
for a tempting Breakfast or Afternoon Tea
Date Bran Gems
Meat Paste Sandwiches
Fish Paste Sandwiches and Tea

Look for the Quaker Natural Bran logo on your tin. It has all the things you need for this delicious breakfast or afternoon tea. For more ideas see the package.

QUAKER NATURAL BRAN is a special cooking bran. Because it is natural bran it mixes better, rises lightly and makes bran muffins, cakes, cookies and bread more delicious, more appetizing. And it's much more economical for baking than prepared brans.

If you've never used Quaker Natural Bran you don't know how delicious bran dishes can be—try it and enjoy that real natural bran flavour.

QUAKER
Natural Bran
ESPECIALLY ECONOMICAL FOR COOKING

her eyes, which had grown sleepy, and asked: "The children?"

"All safe," Matt answered; then, as a cry of pain escaped her, "Oh, Nancy! It is as bad as that?"

It was very bad indeed, but with returning strength she said, "I'm all right, and though there were times in the hours to come when her face twitched with anguish, no whimper passed the girl's lips again.

Later she woke to find Cousin Columbine beside her bed.

"How do you feel, dear?" the crisp old voice was shaken with emotion. "Nancy scarcely recognized it. 'How's—Jack?' she asked. 'I'm stronger than Jack. I wish . . .'"

The weak words lagged, and Cousin Columbine said quickly: "Your brother's making a brave fight, child. I always said he had the courage of a pioneer. And you have too, Nancy. I am so proud of you."

Nancy said nothing for a little while. Scenes from those tragic hours were crowding back.

"You were right about the weather, Cousin Columbine," she admitted in a curious, small voice. And then, a tear slipping, from beneath her lashes: "I wish . . ."

"What do you wish, dear?" asked the old lady, bending closer.

Nancy tried to smile, but found herself too spent to move, and only a "a little homesick," she acknowledged.

A nurse came in just then with a strange doctor, and Cousin Columbine went out. They looked at her legs, and brought another doctor to look at them. Nancy was sure that they were thinking; but was too tired to ask and dropped asleep before they left the room.

It was night when she opened her eyes again. A dim light burned, and a different nurse was there, and a new doctor. No, it wasn't a doctor, Nancy saw after a moment. It was just Matt Adams. She heard the woman say to tell Miss Nelson that her niece was sleeping, and that after a consultation the doctors felt that, after all, she wouldn't lose her feet.

Now how in the world, mused Nancy, only half awake, could you lose your feet even if you wanted to? That nurse was crazy. She spoke as if your feet could be mislaid like a pair of gloves or a pocketbook or something! The idea made her almost laugh. Then, realizing that Matthew was about to leave, a wave of homesickness swept over her again, and she protested.

"Don't go, Matt!"

Again the unexpected voice startled her, but Matthew came close, and stood there looking down at her. Then some one turned up a light, and Nancy saw how unbelievably tired he was.

"Better!" His voice was heavy with fatigue and long anxiety.

"Where's Cousin Columbine?"

"In bed. It's pretty late. She's staying down here to keep an eye on you."

"And—Jack?"

There was a noticeable pause before Matt answered steadily: "Don't worry about Jack, Nancy. That kid's the dandiest fighter you ever saw!"

The nurse turned at this, and going to a window, did something: "Is there anything I can do before I go, Nancy?"

"You're so tired, Matt," she answered with irritation.

He smiled at that and didn't look so tired after all; but the girl said: "You won't drive up the pass to-night, will you? Promise me you won't—or I'll worry."

"I promise. I'll stay down here with John. Mother thought Miss Columbine might need me in the morning for—for errands or something," he added hurriedly. "Now be a good girl, Nancy, and go to sleep."

"Couldn't you stay till I drop off?" she pleaded. "I'm kind of—homesick."

Matt glanced at the nurse, not knowing what rules there are in hospitals; and at a nod set down by Nancy's bed.

"We can't let you be homesick,"

Find Out
From Your Doctor
if the "Pain" Remedy
You Take Is Safe.

Don't Entrust Your
Own or Your Family's
Well-Being to Unknown
Preparations

BEFORE you take any preparation, you don't know all about the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin."

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were advised against by physicians as being bad for the stomach, or, often, for the heart. And the discovery of "Aspirin" largely changed medical practices.

Countless thousands of people who have taken "Aspirin" year in and year out, have proved that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the *fastest methods yet discovered* for the relief of headaches and all common pains . . . and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get
"ASPIRIN"

be told her gravely, "but you mustn't talk."

As the nurse (smiling in a manner that would have brought a blush to the young man's cheek if he had been so utterly unself-conscious in that moment) turned down the light and left them for a little time, it seemed to Matt that all his weariness had dropped away. Nancy wanted him to stay. No matter what happened, he'd always have to take to remember. He might be awkward and bashful where most girls were concerned, but now, when she was weak and suffering, the one girl in the world had asked him to stay.

After all, life was pretty wonderful, thought Matthew Adam, forgetting in the moment, the grim fight waging in the room beyond.

(To Be Continued)

Protection From Colds

A New Vaccine Is Said To Give Immunization

The American Public Health Association has made public a report on a new vaccine against the common cold. The report showed the blight of many, though at present not all persons, can be immunized against catching colds to the extent that susceptible sufferers become as free as the hardy persons who have a cold only now and then.

The vaccine report is one of 225 medical and public health papers to be read at the association's annual meeting. The protective is described by George C. Rockwell, M.D., associate professor of bacteriology, of the University of Cincinnati College of Medicine.

It is a vaccine first described last June. The new development is the immunizing effect on the blood.

Legend Of An Elephant

Burmese Think Marauder Is Reincarnation Of Old Villager

"Po Chaug" is usually a fierce, marauding rogue elephant, the terror of the Burmese jungle, who destroys crops wherever he goes. But when he comes to the field of Mogok (Burma) the villagers merely come out and say, "Po Chaug, please don't do it, we are poor; go away; and he ambles off obediently into the jungle. The legend goes that he is a reincarnation of an old Mogok villager who died some years ago and that is why he spares their crops.

Dog Gives Evidence

Proved To Judge He Was Not The Biting Kind

"Jimmy," a seven-year-old mongrel, who was alleged to have bitten a city employee, was put into the witness-box at Long Beach, California, to determine whether he was "of the biting kind" or not. The judge addressed a few pointed remarks to "Jimmy" at close range. The dog growled at him, but made no attempt to bite his honor, who thereupon pronounced the animal "not guilty."

Manager: "Are you sure you are qualified to lead a jazz orchestra?"

Applicant: "Absolutely. I've had two nervous breakdowns, was shell-shocked in France, and I live in an apartment above a family with twelve noisy children."

Lady: "You would stand more chance of getting a job if you would shave and make yourself more presentable."

Tramp: "Yes, lady, I found that out years ago."

Razors Of Prehistoric Times

Date Back 3,000 Years And Were Made Of Bronze

Excellent razors, 3,000 years old, are among the finds made on Mount Kahlenberg, near Vienna, Austria, during excavations for a new road. The razors are bronze and date from the so-called "Hallstatt Period," between 1200 and 700 B.C. They are half-moon in shape and possess a practical handle.

In the course of 3,000 years they naturally have been greatly damaged by corrosion and are unfit for any practical use now; but new razors, made exactly to this pattern, in the opinion of several local master barbers, are equal to the best modern English and Swedish razors now in use in Vienna's barber shops.

The excavations on the Kahlenberg disclosed a large cemetery where ashes of the dead, after the bodies had been burned, were buried in earthen urns.

The "Vimanas" of that prehistoric epoch were not acquainted with the potter's lathe; all the urns and other pottery discovered in the cemetery were turned by hand.

Aside from the charred bones, the urns contained a wealth of funeral gifts, particularly small earthen vessels and other pottery, most of which bear delicate painted ornaments in black and red patterns.

In addition to the razors, the urns contained arm-bands and finger-rings, particularly small earthen vessels and other pottery, most of which bear delicate painted ornaments in black and red patterns.

The swords are of a soft iron while the rest of these objects are bronze. As the swords in their original shape proved too long to find room in the urns, they were bent twice or more to fit into the funeral vessel.

Archaeologists are puzzled over the fact that, despite eager searching, so far no trace of an adjacent human settlement of the Hallstatt period has been discovered, with the exception of a single small house which may have been the dwelling of the graveyard's custodian.

All the collected objects are now being cleaned, classified and prepared for exhibition in Vienna's Municipal museum.

Using Ancient Privilege

Royal Marines Go Through Old Ceremony In London

The Royal Marines, who at the King's expressed desire are camping guard at Buckingham Palace while the regular Guards are away on manoeuvres, for the first time will exercise their ancient privilege of marching through the city with bayonets fixed, drums beating and cords flying.

The privilege arose from the fact that the Marines are direct descendants of the "trained bands" of Elizabethan and Stuart days. Nevertheless, permission of the Lord Mayor is necessary. Lord Chelmsford, Barrack, the Marines will halt at the Thames Embankment, where bayonets will be fixed and colors uncased. The City Marshal will challenge them at the boundary of the city proper, after which he will ride at the head of the force, the Lord Mayor taking the salute at the Mansion House.

The Marines comprise three divisions permanently stationed at Chatham, Plymouth and Portsmouth. This is the first time they have ever done duty in London.

Lands Canadian Flyers

Rear Admiral Byrd Says Dominion Pilots Best For Arctic Exploration

A tribute to Canada's north country flyers was paid at Toronto by Rear-Admiral Byrd, famous United States Antarctic explorer. Replying to Mayor Simpson's welcome at a civic reception outside of city hall, Admiral Byrd said Canadians knew more of any other country than any other pilot. Long experience flying over snow and ice and in sub-zero weather made them excellent pilots for Arctic or Antarctic expeditions, he said.

"My wife went to see the doctor and he ordered her to take plenty of exercise."

"Is she doing it?"

"I suppose so. She spends all her time jumping at conclusions and running up bills."

Defective Chimneys and Flues

Chimneys Should Be Inspected At Least Twice A Year

Defective chimneys and flues were the cause of 21,000 fires in Canada during the last three years.

It is unfortunate that architects, masons and people generally, are so careless in the construction and maintenance of chimneys and flues. The haphazard method of construction and indifferent use and care place them among the worst offenders.

The chimneys and flues are the chief cause of fires in dwellings and consequently should be most carefully guarded.

Inspect and clean your chimneys and flues at least twice a year. Never start heavy winter firing without a thorough inspection and repairing of heating appliances and clearing of chimneys.

Give Away Money

Directors and large stockholders of various United States corporations have given away about \$53,000,000 worth of securities in the past six months. About three-quarters of the \$53,000,000 was given away after President Roosevelt had asked Congress to increase gift taxes.

Soap will not transmit germs. Experiments with samples taken from hotels, machine shops, etc., have been made and in no instance was there a single living organism found.

An ethnologist finds that not only

lemons themselves but the name, with slight modifications, spread from India to far corners of the globe.

PLE SUFFERERS

HAPPY RELIEF

For Good Health

Overeating Especially After Middle Age Is Very Injurious

Over-eating is almost as injurious as over-indulgence in spirits. Expansive waist lines may be a mark of beauty in some countries, but here they are considered neither beautiful or healthy. The public health service has never gone into the aesthetic phase of the question but its records are not encouraging to the overweight who are given to worrying about their health. Keep that bourgeois figure if you would live long, is the advice of the service's statisticians.

In the fight for good health being underweight is a distinct advantage in middle age. The death rate in middle life is lower among persons who are underweight and increases rapidly as the weight increases beyond the normal. For example, the death rate for persons between the ages of 40 and 49 who are 10 and 20 pounds underweight, is just half that for persons between the same age limits but 10 or more pounds overweight. From the conclusions of the public health service, it would appear that lowering the mortality rate from this point is largely a matter of diet and appetite control, which the government health agents will find more difficult than fighting germs and epidemics. You can teach a man to drink from a sanitary cup and to shun a quarantine sign, but most persons cannot even be frightened away from the dinner table.

Lord Strathcona Story

Incident Is Related Of The Early Days Of The Fur Trade

A little-known story was told in Montreal recently of the duking of the late Lord Strathcona, prominent Canadian financier, when as Donald Smith, factor for the Hudson's Bay Company, he assumed Hudson Bay to be his company's exclusive territory and ordered all fur traders out of the district.

The story was told by McGregor Mowat, 91-year-old veteran of many a fur-trading expedition in Canada's northern fastnesses when he disembarked from the Duchess of Richmond after his first visit to his native Scotland since he left there in 1865.

Mr. Mowat related that Mr. Smith, as he was known then, was anxious to discourage competition in his district and would order other traders out of the Hudson strait. "He ordered me out when I came up the strait in my boat," he recalled, "but I wouldn't go back. There was a scuffle and it was Donald Smith who went to the water. I went over after him and fished him out. After that we got on well together."

Mr. Mowat left his home in the Orkney Islands and came to live in Canada 70 years ago. He lives on his farm at Danville, Que.

Qualifications Listed

British Broadcasting Expert Tells What Radio Announcer Must Do

A radio announcer's qualifications are listed by a British Broadcasting expert as follows: If he is to be a good radio announcer: Read a news bulletin full of Japanese, Chinese, Bolivian, Indian, Portuguese, Persian, French and German names, without turning a hair; give a ROS in French that has a remote chance of being recognized as French where that language is spoken; read a weather report in such a way that people will really take an interest in that depression off Iceland.

HEALTH-GIVING MINERAL SALTS IN SASKATCHEWAN LAKE

WATERS OF LITTLE MANITOUP RICH IN NATURE'S MEDICINES

FOUND MORE ABUNDANTLY HERE THAN IN OTHER WORLD FAMOUS SPAS

More and more the marvellous heritage of Canada is impressed upon Canadians.

More and more, Canadians talk about the wonders of Little Manitou Lake—whose curative waters abound in health giving minerals—more point than the famous waters of Carlsbad in Europe—situated near Wratons, in the Province of Saskatchewan.

Tons of Salt Crystals gathered from this Canadian Lake—selection of salts and presented in highly concentrated form—non-effervescent—are sold through your retail Druggist under the name of SASKATCHEWAN. Like the famous waters of Carlsbad, Saskanal is invaluable in the treatment of Rheumatism—Nervous Stomach Disorders—Kidney and Liver troubles—Impure Blood—Skin Eruptions and Constipation.

If you are not enjoying vigorous health, or if you suffer from any of the above complaints—try a treatment of "Saskanal." Our package—one price, 60c. Let us send you a FREE sample of SASKATCHEWAN. MAIL THIS COUPON TODAY.

RUSTED WHEAT FOR SEEDING PURPOSES

On account of the wheat rust epidemic in the prairie provinces many farmers will be obliged to use wheat as seed which has been more or less injured by this disease. Many badly rusted samples have already been tested in the laboratories of the Seed Branch, Dominion Department of Agriculture at Winnipeg, Saskatoon and Calgary. Germination tests show that even very poor, shrunken kernels are capable of producing seedlings, but these seedlings are weak and spindly. It should be remembered that germination conditions in the laboratory are practically ideal, and that very many of the weak seedlings will not survive in the field particularly if soil moisture and temperature conditions are not favorable at the time of seeding.

Owing to the size of the rusted kernels there are very many more per bushel than in normal plump wheat. This means that in spite of injury rusted seed will give a good stand. However, the seedlings will be weak and subject to the attacks of root rot and similar diseases. Badly shriveled seed should not be treated with formalin for the control of smuts; instead copper carbonate or one of the dusting materials recommended should be used. Rusted cereals should be well cleaned so that the heavier kernels are used for seeding.

NOTICE TO CREDITORS
In the matter of the Estate of Margaret Catherine Slaughter, Deceased, late of near the Village of Bentley in the Province of Alberta, Married Woman.

NOTICE is hereby given that all persons having claims upon the Estate of the above named Margaret Catherine Slaughter, who died on or about the 15th day of March, 1935, are required to file with the undersigned as Solicitor of the Estate of the said Deceased by the 16th day of November, A.D. 1935, a full statement duly verified of their claims and of any securities held by them and that after that date the Executor will proceed to distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been filed or which have been brought to the knowledge of their Solicitors. Dated this 18th day of October, A.D. 1935.

C.N.R. Policeman Returns to Canada With Many Honors

MONTREAL.—Canada's lone pistol and revolver shooting representative at the Bisley Shoot, in private life Constable R. G. Pickrell, of C.N.R. police force at Winnipeg, returned to Canada a few days ago with a load of medals, cups and badges and the official designation of world's master shot, by virtue of winning a gold badge in the Maitre Tirez world's pistol competition at Rome. While overseas, Pickrell won the Scottish pistol championship at St. Andrews, the British open championship at Birmingham, England, when he established records in the three stages of the match; registered a "possible" in the Olympic world's championships at Rome; qualified in the Maitre Tirez match at Rome, winning a gold badge with 11 points to spare and lost the Bisley pistol championship by only one point.

His shooting activities were punctuated here and there by bad luck. While taking part in the Bisley revolver aggregate shooting, Pickrell had his wrist and shoulder injured. Waiting from the camp to the post office one night, he was knocked

\$200,000 Spent in Alberta by Tourists In Alberta This Year

Revealing an increase of nearly 50 per cent over two years ago, nearly 42,000 tourists from the United States entered Alberta this year through the two Canadian customs ports at Coutts and Carway, on the Alberta-Montana border, according to "Voice of Motordom," official organ of the Alberta Motor Association.

The figures given do not by any means represent the total of United States cars that entered the province this season as besides those which came from the east by way of Manitoba and Saskatchewan, many others came in over the Crownsnest or Banff routes.

Of the 15,753 cars that entered the province by way of Carway or Coutts, there were 1,363 from Montana, 660 from California and 305 from Illinois.

Taking the average that every tourist spends a least \$5 in the province, it is a fair estimate that these visitors from the United States put over \$200,000 into circulation in Alberta.

This bears out the contention that it is good cash business, and something that this province needs, to increase the tourist movement to Alberta.

down by a motor cyclist and because of his injuries had to drop out of the revolver competition. Recovering sufficiently to take part in the pistol finals, however, he was within one point of victory, the winner being a shot whom Pickrell had previously defeated in the British Open at Birmingham. Again ill luck pursued him in the Olympic shoot at Rome. After qualifying with a "possible", Pickrell in the final had to fire six shots in four seconds, one of his cartridges misfired but his other five shots were such that he finished tenth in the world list.

The Maitre Tirez competition was the most important of all in the world's shooting. It was the one brought together the world's best pistol shots to fire under very difficult conditions. In this shoot Pickrell qualified with 11 points to spare, thus winning his "master shot" gold badge. Returning to Canada on the Camarer Anonia, Pickrell brought with him a trunk full of medals, badges, cups and silver tankards to add to his already extensive store of trophies.

I have now in operation my Carter Disc Wheat Cleaner, capacity 150 bushels per hour, and am now prepared to do custom cleaning. Frank Bow 1211, Phone No. 60.

Oct. 10-17-34-31
CABBAGE—29 pounds 25 cents; 100 pounds \$1.00. Dressed. Matt Burgin.

FARM FOR SALE—N.W. 30 and S.E. 10, Township 44, R. 1, W. 5. \$4800 takes either one. Clear title and taxes paid to date. J. W. Whitte Phone 151.

AUCTION SALES

C. F. Darnon, the well-known auctioneer, conducted a sale of live stock and machinery at the farm of R. W. Fletcher, 7 miles northeast of Lacombe, on Wednesday, Oct. 29. Considering the weather, fair prices were reached. The preceding day Mr. Darnon disposed of the cattle of Mr. F. J. Ramsey, 2 1/2 north of Lacombe. Although the weather was very bad, the young stuff brought over market prices.

LEST-WE-FORGET CLUB

The annual sale of Veteran Poppies will take place on Saturday, Nov. 3. Poppies derived from this sale go to aid disabled veterans of the Great War and their families. A union service will be held in the United Church on Sunday evening, Nov. 10, and the annual Remembrance Day Service will be observed at the Cenotaph on Nov. 11 in the Lest-We-Forget Memorial Park at 10:45 a.m.
